

## **Tell Your COVID-19 Vaccine Story Make a Difference in Your Community**

Congratulations on getting the COVID-19 vaccine! You are taking an important step to protecting yourself, your family, and your community.

We know that the more people who get vaccinated, the sooner we can begin to return to normal life. We hope that you will join other community members and human services workers in helping to spread the word that the COVID-19 vaccine is safe and important.

We encourage you to share your COVID vaccine story by **making a short video on your phone of yourself talking about your vaccine experience and sharing it on social media!**

Here's how you can participate:

1. Take a short video of yourself after your vaccine. Make sure to include some or all of the following information:
  - a. **Who you are!** (Are you a human services worker, a faith leader, a community member?)
  - b. **Were you afraid before getting the vaccine?** (It's okay to say you were!)
  - c. **Did you have any side effects? What were they?**
  - d. **Why did you get the vaccine?** (To protect your family? To get back to normal life?)

**\*\*If you don't want to make a video, you can take a photo of yourself getting the vaccine or after the vaccine and write your information into a Facebook or Twitter post!\*\***

2. Share your video on social media!
  - a. Make sure to **tag HSC** (Twitter: @HSC\_NY, Facebook: Human Services Council of New York, Instagram: @HSC\_NY) so we can help promote your content to other providers and community members.
  - b. Use the hashtag **#myCOVIDvaccine** and **#NYCVaccineForAll** to be a part of the conversation and to help others find your videos.
3. Spread the word by sharing this document and asking your family, friends, and colleagues to do the same when they get vaccinated!

THANK YOU for helping keep your community safe!
